Jessica:

When you respond to this can you also send me your PMRA contact information?

Thanks,  
Heather

Jessica:

We will talk with HED and get back to you.

Do you know the rationale behind PMRA wanting to set the tolerance at 40 ppm vs. 30 ppm?

Heather

Hi Lindsay,

We do not necessarily have to have a call. I just wanted to let you both know what was going on in Canada, so I could try to align the MRLs if possible. If someone from the risk assessment team would like to discuss with PMRA, they are open to talking with EPA. Does EPA reach out to other agencies in situations like this?

Thanks,  
Jessica

Hi, Jessica.

Would you still like to do a call or could we just send this information on to the risk assessment team?

Thanks,  
Lindsay

**Subject:** RE: [I] RE: Taminco US LLC - Amendment to Import Tolerance of Chlormequat Chloride in or on Oat Grains

Hi Heather,

We submitted the same data for oats to PMRA in Canada in mid-2018 to establish a tolerance for chlormequat chloride in or on oat grains. We asked to have the tolerance set at 30 ppm to be consistent with what we would request in the US. We recently received feedback from PRMA that they will be setting the tolerance for chlormequat chloride in or on oats at 40 ppm. This should be final this December. I'd like to discuss potentially setting the US tolerance at 40 ppm as well to maintain consistency and to allow for importing and exporting of oats without issue between the US and Canada.

Thanks,  
Jessica

Jessica:

The PM is Lindsay and I am the reviewer. I will check out calendars to see when we can schedule a call. Can you please give us a brief heads up as to what the main issue/question is so we can be prepared?

Thank you,  
Heather

Hello,

I would like to talk to the PM responsible for the action described above. This was submitted in April 2019 under PRIA R292. I thought I would start with you both. Can you tell me who will be reviewing this petition? Can we schedule 15 minutes to have a quick chat over the phone?

Thank you,  
Jessica
